

CIRCULAR SERVICES BY WEPA:

# THE CIRCULATION SOLUTION FOR YOUR ORGANIZATION

WEPA's Circular Services make it possible:

Used towel paper from your organization becomes the raw material for your new hygiene paper. With this circular solution, you measurably reduce waste - and at the same time ensure significant environmental savings and greater sustainability.

LESS WASTE, MORE SUSTAINABILITY:

# WE MAKE THE CIRCULAR ECONOMY POSSIBLE FOR YOU

Avoiding residual waste, conserving raw materials, protecting the environment: WEPA's Circular Services make that possible

The way to achieve this is simple. Your used towel paper is no longer disposed of as residual waste, but collected separately and used as a raw material for the production of new tissue paper. This paper is then used again in your washrooms: the cycle is closed.

## Circular Services by WEPA – Your benefits

- ↳ You measurably reduce residual waste in your organisation and thus achieve environmental savings
- ↳ They become part of a future-oriented, closed cycle - and thus help to protect resources
- ↳ You help your organisation to achieve its own sustainability goals
- ↳ You benefit from our expertise as the market leader for recycled tissue paper

We also support your company with other sanitation services and with internal and external communication about your sustainability activities in the sanitation sector.
